Improvement of work environment with robots in Kanagawa

CYBERDYNE Inc. (“the Company”) announces that, today, its consolidated subsidiary, Shonan Robo Care Center, Inc. in Kanagawa prefecture decided to enter into a service contract (scheduled fee amount: JPY118 million) with Kanagawa prefecture on “Advisory and assistance to improvement of work environment with robots and other devices for the FY 2015”.

1. Business

Advisory and assistance to improvement of work environment with robots and other devices for the FY 2015 (temporary translation):

This is a project for regional human resource development (a work environment improvement process) that utilizes the nation’s temporary and exceptional grant for job creation. Regarding the lack of human resources in care houses, the project aims at the work environment improvement by reducing burden on caregivers with assistive robots, and reduction of employee turnover (improvement of work force stability). Consequently the chronic lack of human resources will be resolved. Shonan Robo Care Center can contribute to the project by advising and assisting introduction of those robots.

2. Contract period (plan)

From the contract date to March 28, 2016

(The contract will be entered into in a few days.)

3. Scheduled fee amount

JPY118 million

4. Future prospect

The fee income will be posted in the Company’s consolidated income statement as of March 31, 2016.
