

【News】 Daido Life Insurance launches the first new product to guarantee state-of-the-art treatment with Medical HAL for intractable diseases
~the introduction of the world's first private insurance product for treatment of intractable diseases with HAL, following coverage by public health insurance ~

Daido Life Insurance Company (“Daido Life”) announces the release of its innovative new insurance product “HAL Plus rider”, the world’s first insurance product offered by a private insurance company* that covers treatment of intractable diseases with the world’s first robotic medical device HAL for Medical Use (Lower Limb Type) (“Medical HAL”). This announcement follows coverage of the innovative treatment with Medical HAL by public health insurance. (For details of this new insurance product, please refer to the following URL).

*According to the research conducted by the Company as of April 2017

Since its business alliance with CYBERDYNE, INC. (the “Company”) in September 2016, Daido Life has aimed to develop new insurance products to reduce the burden of treatment costs for patients who receive treatment with Medical HAL, and now, after acquiring approval for the new insurance product through the Financial Services Agency's product review, Daido Life became the industry's first company to realize this innovative product. This will promote the dissemination of the new medical technology Medical HAL, and also provide more peace of mind to patients who receive the state-of-the-art Cybernic Treatment for rare neuromuscular diseases, which have been regarded as difficult to treat even with the latest medical

advancements.
