CYBERDYNE, INC.

Tsukuba Robocare Center opens

CYBERDYNE, INC. (the “Company”) will open the Tsukuba Robocare Center within the Company’s facility CYBERDYNE STUDIO as a center to offer training program with HAL.

At CYBERDYNE STUDIO, the Company has been providing “HAL FIT” which is a new type of a training program using HAL, a device capable of realizing intended motion of the wearer. The Company determined to renew the area which was initially offering this program as “Tsukuba Robocare Center” in order to reinforce the endeavor to strengthen coordination with other Robocare Centers and positioning the facility as a base of sales and training for Cybernics Technologies such as HAL.

Furthermore, the initial focus of the facility was to offer training with HAL for visitors with disabilities. Tsukuba Robocare Center will start to offer new training menu that targets to induce improvement in the body core and lower limb function of the elderly visitors.

Tsukuba Robocare Center will become the 6th Robocare Center in Japan. In addition to opening of Okayama Robocare Center that was announced today, the Company also schedules to open a Robocare Center in Sendai, Hiroshima and Kita-kyushu city. For the HAL FIT program offered in the related Robocare Centers, some private insurance contracts*1 and shareholder benefits*2 can be used. Upon using the aforementioned scheme, there are certain conditions which would be applied, so please check the following documents for the details.

The Company will continue to expand its business in order to improve access by the potential visitors. Through this endeavor the Company hopes to make contribution in the formation of a society where people with disability and elderly could continue to have initiative in their action.
